

Water-based Inkjet

Water-based inkjet printing is the choice for economical price and environmentally-friendly. Water-based ink provides an outstanding and vivid printed color. However, it has limited durability and moisture resistance. In this situation, Symbio can help to solve the problem. Our products are specially coated for excellent ink absorbency, and also be applicable for dye and pigment-based ink.

Key Features

- Applicable for dye-based and pigment-based ink.
- Specially coated surface for excellent ink absorbency.
- Eco-Friendly materials.
- Support most water-based inkjet printing presses.
